차량 출입 기록 관리 서비스

Servers

http://localhost:8080 - Generated server url

Record API 차량 출입 기록 CRUD

PUT /api/records 차량 출입 기록 수정(ADMIN)

AI 모델이 예측한 값이 틀린 경우, 관리자가 확인 후 수정, S3에 저장된 번호판 이미지 삭제, 재학습을 위해 차량 이미지 relearn 폴더로 이동

Parameters

Try it out

No parameters

Request body required

application/json

Example Value Schema

```
{
    "recordId": 0,
    "licensePlate": "string"
}
```

Responses

Code Description Links No links 200 OK Media type */* Controls Accept header. Example Value Schema {} /api/records 차량 출입 기록 저장 **POST** Flask 서버로 이미지 전달, AI 모델이 번호판 예측, S3에 이미지(차량, 번호판) 저장, 가장 정확도 높은 예측값 Record 인스턴스로 저장 **Parameters** Try it out Description Name vehicleFile * required 파일 선택 선택된 파일 없음 string(\$binary) (query) Responses Code Description Links No links 200 OK Media type */* Controls Accept header. Example Value Schema "record": { "recordId": 0,
"modelType": "YOLO",
